

Developing Students' Competency Skills

EXPLORATION WEBINARS

The **Empowering Arizona with Social Emotional Learning** project (formerly the AZCCCTT project) is offering six professional development opportunities for the 2020-21 school year. Through collaboration with **Arizona Department of Education**, the training opportunities will be **free of charge**.

During these interactive webinar sessions, we will **improve our understanding** of the competency, **practice strategies** to use with students virtually, and **discuss opportunities** to embed competency instruction during remote learning with our current curriculum.
